

FEATURES

- Fully Independent Wings
- Heavy Duty Moldboard and Hinge Construction
- Angle Snow Plow and Box Plow in One
- 3 Function Hydraulic Valve Available for operation
- Road Oscillation to follow road contour
- Carbide Insert Cutting Edges Available

Rylind "FWP" Hydraulic Folding Wing Plow is a revolutionary plow for clearing snow in parking lots, airports, city streets, and any place where one pass clearing is what you are looking for. The FWP Plow goes from a standard angle plow to a box plow with two outer hydraulic folding wings on the plow. Comes in standard plow widths from 12-28 feet. Built with a 42" tall moldboard Snow Flair built in, double top thick wall square tube a-frame, flow control valves for cylinder protection, and a 3" greasable center hinge pin. Our Folding Wing Plow requires 3 open hydraulic functions to operate. Split valves and standalone valves are available. Skid shoes, and plow oscillation for uneven surfaces available.

Rylind Wedge-loc Coupler, Pin-loc Coupler, Parallel Lift Group, Pin-on Mounts, JRB, Volvo, Deere, CAT, and many other coupler systems are available.

*CAT, Deere, Volvo, JRB are registered trademarks of their respective companies.
