

### FEATURES

- heavy duty winged angle plows for skid steer loaders
- universal skid steer quick coupler, or pin-on mountings
- non-tripping moldboard for heavy snow removal applications
- push frame is heavy wall, double a-frame tubular construction
- full box framed blade and wings
- side wings for high production snow removal, reducing side-spillage
- optional moldboard oscillation leaving push frame level to the ground
- large center pin diameter (2") for long life

These plows are designed for heavy snow removal applications in parking lots, parking structures, city alleyways, sidewalks and gutters, bike paths and limited access areas. The plow moves approximately 40% more snow per pass than a conventional angle plow. Excellent for cutting hard pack away from curbs and gutters and stacking snow away from traffic areas.

### SPECIFICATIONS
