

### FEATURES

- Motor Grader or Wheel Loader Applications
- Quick Coupler and Lift Group Mountings
- Left/Right Angle, V-Plow, and Inverted-V Configurations
- Full Box Section Moldboard Construction
- Heavy Wall Double Square Tube A-Frame
- Large 3" Center Hinge Pin
- Tapered Extended Snow Shields are Standard
- Dual Cross Over Reliefs for Cylinder Protection
- Requires Two Auxiliary Valves for Operation

Rylind MDP Series Folding-V Dozer Plows operate in a left or right angle, a V-Configuration, or an inverted V-Configuration for the maximum efficiency when plowing. Dual Cross Over Reliefs for cylinder protection eliminates the need for nitrogen accumulators. Tapered extended snow shields are standard. Standard plow lengths are 12', 14', 16' with a 48" tall moldboard. Optional Electric/Hydraulic selector valves and mushroom skid shoes are available.

These plows work great with Wheel Loaders and Motor Graders. Rylind Wedge-loc Coupler, Pin-loc Coupler, Parallel Lift Group, as well as many OEM style coupler systems are available.
