

FEATURES

- Motor Grader or Wheel Loader Applications
- Quick Coupler and Lift Group Mountings
- Left/Right Angle, V-Plow, and Inverted-V Configurations
- Full Box Section Moldboard Construction
- Heavy Wall Double Square Tube A-Frame
- Large 3" Center Hinge Pin with gusset reinforcement
- Extreme Tapered Snow Flair
- Dual Cross Over Reliefs for Cylinder Protection
- Requires Two Auxiliary Valves for Operation

Rylind MDPX Series Folding-V Extreme Snow Flair Plows operate in a left or right angle, a V-Configuration, or an inverted V-Configuration for the maximum efficiency when plowing. Dual Cross Over Reliefs for cylinder protection eliminates the need for nitrogen accumulators. Snow flair goes from 48" tall at the center to 70" tall at the outer tips. Standard plow lengths are 12', 14', 16'. Optional Electric/Hydraulic selector valves and mushroom skid shoes are available.

These plows work great with Wheel Loaders and Motor Graders. Rylind Wedge-loc Coupler, Pin-loc Coupler, Parallel Lift Group, as well as many OEM style coupler systems are available.
