

FEATURES

- 2-Pin Removal, Quick Detach
- Twin Cylinder Operation
- Heavy Duty Construction
- Wide Opening for loading bucket
- Single Grapple Operation
- Third Function Valve Required for Operation
- OEM Pin-on or Coupler Equipped

Rylind Quick Detach Grapple Buckets are designed for handling bulk materials like hay, brush, trash, and other recycled materials. They can be used for charging grinders, mixing trucks and handling round or square hay bales in the feed yard. The grapple can be removed by pulling two pins and grapple will stand upright when not on the bucket.

Various types of mounting systems are available including the Rylind Wedge-loc coupler systems, Pin-loc coupler systems and Pin-on mountings.
